

Job Posting

Electrical Production Engineer

KP Consulting seeks a production oriented Electrical Engineer to enter into an exciting project with development of the future signal system for European Railways. ETCS is a common European signal system which, besides in Europe also is introduced in a number of countries outside Europa.

Who are we

KP Consulting is a Danish consulting firm with a subsidiary in Israel. The firm was founded in 2006 and it support the railway sector within project management, quality assurance, development and HSE. Besides we also focus on recruitment and development of new business areas in collaboration with our customers.

Job function

The ETCS signalling system is a new business area for the company and your role in the project will be to support the implementation of ETCS in an international project. You will work closely with experienced engineers and together carry out different process from the start to the end of the project.

Typical process activities in connection with the implementation of the ETCS-signalling system:

- Kick-off meeting
- Prepare scenario for survey
- Complete survey – on site
- Prepare design and installation concept.
- Develop detailed design
- Reviews
- Installation support – on site
- Prepare “As built” documentation.

You will be involved in most of the processes and in the long term you may be responsible for some of the processes.

Skills and experience

Emphasis is placed on having experience with:

- Electrical documentation.
- Preparation of bill of material.
- Installation Manuals
- Design work with incorporation of components
- Planning
- Specifications

Experience with drawing programs in electrical and mechanical work is a great advantage. The job does not require experience with train equipment, as you will be supported by our competent Train Engineers and project managers.

It is positive if you have an engineering or equivalent technical and relevant education.

Emphasis is placed on whether you can work with international projects and have the courage to work independently and take responsibility for your work.

The job contains a certain level of travel activities and therefore you must be flexible in connection with this.

In case you have questions or need any further information about the position please contact
